Title search auto completes / sugests and/or drop down (both would be nice) makerial UI components with theming maybe fabric. is to draw the tree fragment on a carras? Selecting unother node on the tree view changes the comparison

Future features (may bes):

- full tree view on another page
- fuller listof + Hes/paths
- self review functionality a.g. checkboxes instead of list bullets
- . Shareable but put
- bosting somewhere with CIVCD
